Neil Malan

n.malan@unsw.edu.au | 0477143286

EDUCATION

UNIVERSITY OF CAPE TOWN
BSc (Hons, 1st class), Marine Biology and Ocean and Atmos. Science
Dec 2011 | Cape Town, South Africa

MSc, Ocean and Climate Dynamics
Jul 2013 | Cape Town, South Africa

PhD, Physical Oceanography
Jul 2018 | Cape Town, South Africa

RESEARCH PROFILE

I am an oceanographer with a background in boundary currents, eddies, cross-shelf exchange and mixing – and the observational and modelling methods used to quantify them. Increasingly I am drawn to the ecological side of these systems, where physical structure sets the conditions for productivity, habitat and dispersal. I work especially on marine extremes, including marine heatwaves and flood-driven salinity events, and on the methods and conceptual framing that link them to biological outcomes. Much of my contribution lies in connecting scales and disciplines – relating basin-scale variability to local coastal impact, and working across the boundaries between oceanography, ecology, fisheries science and coastal hazards.

EXPERIENCE

UNIVERSITY OF NEW SOUTH WALES | Senior Research Associate, Climate Change Research Centre
July 2023 - Present | Sydney, Australia

- Academic level B position, working with Prof. Alex Sen Gupta
- Research focus on subsurface marine heatwaves.

UNIVERSITY OF NEW SOUTH WALES | Postdoctoral research fellow, Coastal and Regional Oceanography Laboratory
Nov 2018 - June 2023 | Sydney, Australia

- Academic level A postdoctoral position in the School of Biological, Earth and Environmental Sciences, working with Professor Moninya Roughan.
- Research focus on cross-shelf Western Boundary Current processes and temperature trends
- Contribute to management of IMOS observation programme as deputy-leader, New South Wales Moorings.

NANSEN-TUTU CENTRE FOR MARINE ENVIRONMENTAL RESEARCH. | Postdoctoral research fellow
February 2018 – Sep 2018 | Cape Town, South Africa

- Assist in development of base HYCOM model for operational data assimilation.
- Supervise post-graduate research student.
- Organise international workshop on modelling the Agulhas Current System.

SOUTH AFRICAN ENVIRONMENTAL OBSERVATION NETWORK | Doctoral research fellow - professional development program
November 2013 – Sep 2017 | Cape Town, South Africa

- Undertake PhD research.
- Contribute marine expertise to national science meetings.
- Participate in educational programmes for underprivileged schools.

TEACHING

UNIVERSITY OF NEW SOUTH WALES | Course Co-convenor
2024 - present | Sydney, Australia

- MSCI3001/MSCI5004 Physical Oceanography (with Prof. Alex Sen Gupta) – curriculum design, course management, lectures, tutorials and assessment development.
- 2025 overall student satisfaction 5.63/6, well above School and Faculty averages.

RHODES UNIVERSITY | Lecturer, Dept. of Ichthyology & Fisheries Science
2012 - 2013 | Grahamstown, South Africa

- Taught and coordinated the Fisheries Oceanography module for 2nd- and 3rd-year students.

TEACHING ASSISTANT | University of Cape Town & Sydney Institute of Marine Science
2014 - 2017; 2022

- Ocean Dynamics (2nd year) and Operational Oceanography (MSc), UCT.
- Topics in Australian Marine Science (MSc), SIMS.

RESEARCH STUDENTS

COMPLETED
Fernando Sobral. PhD, UNSW 2026
Cross-shelf heat transport in the East Australian Current
Clea Welch. MSc, UCT 2026
Siying Liu - Taught MSc thesis textbfUNSW 2026 - Modelling sea urchin *Centrostephanus rodgersii* larval dispersal from mainland Australia to Tasmania under EAC intensification.
Subsurface marine heatwaves in the Mozambique Channel
Yotam Fadida. MSc, UCT 2019
Trends in the Agulhas Return Current (published in DSR)
Caitlin Sole. Hons, UCT 2016
Impact of relative and absolute winds on eddy variability.

CURRENT
Emma Hu - summer research intern (UNSW) - 1D biogeochemical modelling of the impacts of MHW vertical structures.
Erika Lehmann - Honours (UNSW) - A Novel Lagrangian-Eulerian Framework To Examine the Potential Migration of Various Species Polewards Down the East Australia Current
Rosa Fenhalls - Taught MSc thesis (UNSW) - A machine learning approach to predicting salinity in the Hawkesbury estuary.
Ronak Rathore - Research Internship (UNSW) - Drivers and impacts of the recent Java Marine Heatwave.
Leon Jin - Honours (UNSW) - The hidden role of vertical mixing in driving Marine Heatwaves.

AWARDS

2023 Invited Speaker, *Gordon Research Seminar on Coastal Ocean Dynamics*
2021 Best Postdoctoral Research Paper, *UNSW CMSI*
2018 Invited participant, Physical Oceanography Dissertation Symposium, *National Science Foundation*
2016 Best Student Presentation, Agulhas Current Research Symposium, *SAEON*
2015 SPACES travel fellowship (2-month funded research visit), *GEOMAR, Kiel*

ACADEMIC SERVICE AND OUTREACH

- **Member** 2023-present, Marine Heatwaves International Working Group .
- **Member of Australia's Marine National Facility scientific advisory committee** 2024-present, provide expert advice to the Marine National Facility (MNF) Steering Committee, primarily focused on assessing the research quality of proposed MNF voyages and other matters requiring scientific expertise.
- **Convenor** Oceania Marine Heatwave Seminars. Jan 2025 - present
- **Member of the scientific committee**, 2026 International Conference on Southern Hemisphere Meteorology and Oceanography.
- **Invited contributor**, three chapters (one as co-lead), AGU monograph on marine heatwaves and their impacts (in preparation).
- **Deputy Leader IMOS NSW moorings 2018-2023**, assist in management of mooring program, including contribution to national committees, meeting reporting requirements at both state and national levels, tracking impact and developing data analysis tutorials.

- **Session Convenor or co-convenor** for sessions on Australian Boundary Currents at the Australian Meteorological and Oceanographic Society Annual meetings in 2020 and 2022, as well as Subtropical Western Boundary Current - Shelf interactions at the Ocean Sciences Meeting in 2022.
- **Expert Reviewer** for over 50 articles in journals such as *Geophysical Research Letters*, *Nature Climate Change*, *Journal of Physical Oceanography*, *Global Biogeochemical Cycles* and *Geoscientific Model Development*.

PUBLICATIONS

I have published widely in top-tier oceanography and climate journals, with 10 first-author and 5 second-author papers. My work has been cited 600 times with an h-index of 13 (Google Scholar, 11/06/2026).
